Home-built teleprompter

1/8" dado 1/4" deep for glass (make two to accommodate different size PowerBooks and standing subjects)

Window glass to fit (Tape edges)

38"

Camera

21"

Riser

19"

PowerBook

30"

Be sure to place cross beams low to avoid restricting up-and-down travel of the riser

Most connectors are #10 x 1.25 flat-head wood screws

Slot is cut with a plunge router and a 1/4" straight bit (make several passes for safety)
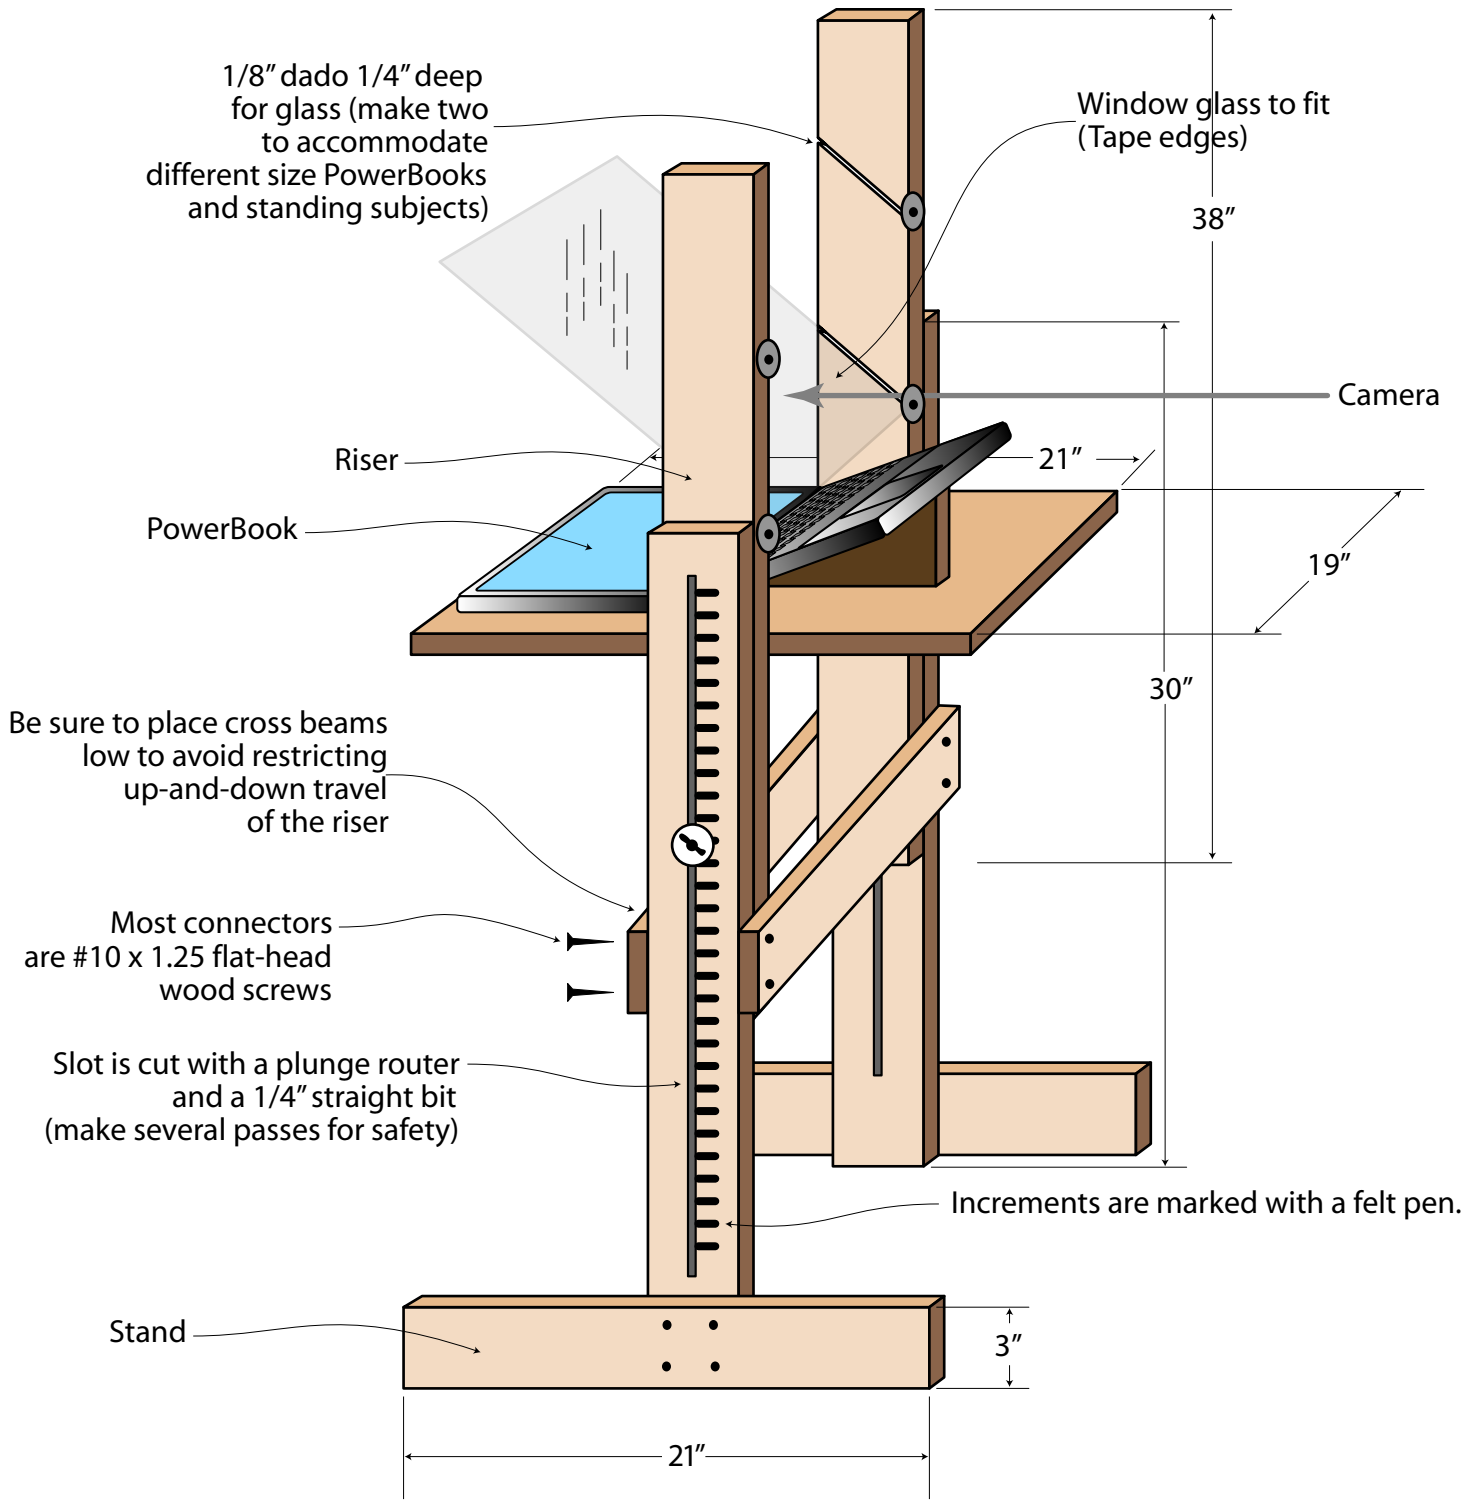

Increments are marked with a felt pen.

Stand

3"

21"

These dimensions allow the teleprompter to be used for seated or standing subjects. All parts are 3/4" Baltic ply (or substitute solid wood). Sand and finish with clear acrylic (if you care).

1/4-20 Brass threaded insert embedded in riser

Fender washer and 1/4-20 thumbscrew

Fender washer and wood screw stop glass at end of dado slot
